Dipto Karmakar

Senior Full-Stack Engineer

diptokmk47@gmail.com · +880 1732646382 · Dhaka, Bangladesh · LinkedIn · Github

PROFESSIONAL SUMMARY

Full-stack engineer with 10+ years in software: desktop systems in C#/WPF and SQL Server, backend APIs in Django REST, FastAPI and Node.js, and, since 2021, senior-level React and TypeScript work for remote teams in Europe and the US. Strongest in frontend architecture, real-time interfaces and API contract design, with hands-on backend delivery at Kiwibot, Anansi Skills and in open-source projects. Seeking a long-term Senior or Lead full-stack role, remote or with relocation.

CORE SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, Redux, TailwindCSS, MUI, Recoil.js, Styled-components, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, Python, Django, Django REST Framework

Databases: PostgreSQL, MongoDB

Architecture: Micro-frontends, Nx / Turborepo, Design Systems, Component Libraries

Real-time & APIs: WebSockets, GraphQL, Apollo, REST APIs

Testing: Jest, Vitest, Pytest, Cypress, Playwright

Cloud & DevOps: GCP, Docker, GitHub Actions, Azure DevOps, CI/CD

Practices: Agile, TDD, Git Flow, Remote-first

WORK EXPERIENCE

Self-Employed

Dhaka, Bangladesh (Remote)

Independent Software Engineer

May 2025 – Present

- Built and maintain backendctl, an open source backend project starter — github.com/dipto0321/backendctl
- Building a full-stack personal finance tracking application (FastAPI, PostgreSQL, React), with open source release planned
- Developing a note-taking application using FastAPI to deepen backend architecture, authentication, and API design skills
- Built a job-aggregation and automation toolkit to streamline sourcing of opportunities across multiple platforms
- Strengthened full-stack capabilities through applied learning in Django, FastAPI, Next.js, and GSAP
- Following a structured AI engineering roadmap covering LLMs, agentic systems, and applied AI tooling

Myze

Emmerich, Germany (Remote)

Senior Full-Stack Engineer (Frontend-focused) · Contract

Mar 2025 – Apr 2025

- Led development of a real-time tablet checkout interface in React and TypeScript with multilingual support and integrated SumUp payments.
- Engineered WebSocket-based systems for device pairing and live payment tracking, improving transparency and reducing customer wait times.
- Built reusable, scalable UI components — tabbed product views, color picker inputs, and GraphQL-powered data tables.
- Collaborated with backend engineers to define API contracts, ensuring reliable real-time state synchronization in production.

ProptechCore

Stockholm, Sweden (Remote)

Senior Full-Stack Engineer (Frontend-focused) · Full-time

Oct 2022 – Feb 2025

- Spearheaded transformation of Figma design systems into production-grade React component libraries, streamlining UI development across teams.
- Delivered pixel-perfect, accessible B2B SaaS interfaces across complex user flows with full design fidelity and performance.

- Designed and maintained a centralized component library enabling consistent UI and faster iteration across teams.
- Built the dashboard side of an MQTT-based IoT prototype
- Built real-time office energy monitoring dashboards with WebSocket data pipelines, balancing UX clarity with data accuracy.
- Provided frontend architecture decisions, estimations, and cross-team technical feedback autonomously in a remote-first environment.

Kiwibot Medellín, Colombia (Remote)

Full-Stack Developer (Mid level -2) · Full-time Aug 2021 – May 2022

- Led refactor of a legacy console application into a scalable micro-frontend architecture using Nx, improving maintainability and enabling team growth.
- Evaluated Amazon Kinesis for robot video streaming and documented the processing delays that ruled it out.
- Implemented real-time WebSocket order notifications, helping supervisors complete tasks 2x faster.
- Built a FastAPI backend over PostgreSQL with advanced filtering, giving data engineers self-service access to operational data

YouMeWho Palo Alto, California, USA (Remote)

Full Stack Developer · Contract Feb 2021 – May 2021

- Built a Chrome extension to auto-scrape and import merchandise, improving client inventory management speed.
- Researched and proposed Facebook API integrations for real-time social media marketing features.

Chosenmasters Vancouver, Canada (Remote)

Full Stack Developer · Contract Sep 2020 – Dec 2020

- Developed a music streaming platform supporting track uploads, merchandise sales, and social features (favorites, follows).
- Delivered e-commerce and audio streaming functionality enabling artist monetization and user growth.

Anansi Skills Chapel Hill, NC, USA (Remote)

Back End Developer · Contract Dec 2019 – Jan 2020

- Designed a social-auth enabled, role-based REST API with full Swagger documentation.
- Deployed a Keras-based deep learning model on GCP for educational analytics.

Microverse San Francisco Bay Area, USA (Remote)

Technical Support Engineer · Full-time Jun 2019 – Aug 2019

- Led 400+ code reviews in Ruby, Rails, JavaScript, and React for 50+ students, accelerating learning through tailored 1:1 guidance.
- Mentored 20+ students to graduation, improving retention and technical confidence.
- Managed 10+ part-time code reviewers, maintaining high standards and consistency across the review process.

EDUCATION

IU International University of Applied Sciences Germany (Distance Learning)

B.Sc. in Data Science 2026-present

United International University Dhaka, Bangladesh

B.Sc. in Computer Science (Partial Coursework — 33 Credit Hours) · 2013–2014

CERTIFICATIONS

- Remote Full Stack Web Development Certificate — Microverse
- Relational Database Design
- Tech on the Go: From Software Developer to Architect
- EF SET English Certificate — C1 Advanced (68/100)
